BELLEVUE BRANCH - E. E. CRANSTON, Manager

## MASON MUST FINISH

### LIFE PENITENTIARY TERM

OTTAWA—Harry Mason, arrested at Calgary for vagrancy, must return to penitentiary to continue his life sentence. It was learned at the department of justice. Mason was released on ticket of leave in 1928 after serving 11 years of a life sentence for murder in Stony Mountain penitentiary, Manitoba.

On the ground Mason violated the terms under which he was released, his license has been cancelled. He was sentenced to death for killing a youth at Winnipeg when he was 19 years old, but the sentence was commuted to life imprisonment.

Calgary police arrested him recently for associating with known criminals. He was released, but later arrested by the Royal Canadian Mounted Police on the vagrancy charge.

The Blairmore Hardware Co. have started moving their stock to the new premises in the McLaren building, next door to Safeways.

The late A. E. Ames, Toronto broker, left an estate of over \$700,000. He left a legacy of \$10,000 to Kingston Raski United church. Upon the death of the annuitant a fund of \$100,000 and one-half the residue of the estate is to be set aside for the benefit of the grandchildren, and the remainder of the capital is to be divided equally among the United church of Canada, National Sanatorium Association and Victoria University.

Another thing we would like to bring to the attention of Mr. Aberhart and the Rev. Derby. The latter gentleman warned the people to be wary of politicians. If Aberhart and Derby are not politicians, we're not in the newspaper game. Just the minute a man steps on the platform to advocate a public issue, he becomes a politician. He might be a good one, he might be a bad one, but he's a politician just the same. If he's a good politician there's nothing to be ashamed of. H. W. Wood found this out years ago, and there's no use trying, to kid the public now.—Ex.

## ARENA NEEDS YOUR SUPPORT

### To The People of Blairmore:

Having incurred considerable expense in putting the rink in shape to provide for Canada's winter recreation, it is now certain that, unless there be a substantial increase in the number of skaters and a much larger attendance, its operation on revenue which is barely sufficient to cover light and fuel accounts, cannot continue.

The rink is not being operated by the Arena Company, and I am operating it on terms which required a heavy expenditure for repairs—an expense which was undertaken in anticipation of a more generous patronage.

Facilities are available for skating every afternoon and evening (including Sunday), except when league hockey games are being played. Tickets can be purchased as follows: Children, 3 for 25c; high school pupils, 15c each or two for 25c; and adults 25c each, or five for \$1.00. No tickets sold on Sunday.

I appeal to you all to co-operate in keeping the rink open by your attendance and support.

Yours truly,

THE MANAGER.

## SOME POINTERS FOR REAL CURLERS

The following interesting suggestions might well be posted in any curling rink. Curlers and former curlers would undoubtedly appreciate their veiled significance.

Always be late. This may be your only chance for publicity.

Never be in a hurry to pay your dues, the caretaker doesn't need his money. If approached by the secretary, tell him that, owing to un satisfactory weather conditions, and a few other reasons, you have not curled many games. In sympathy, he will cancel your obligations altogether.

All alibis should be submitted before the game. You may not need them, but you likely will.

Sweepers should be careful to fit gracefully across the ice just as the shot is being delivered. If possible both sweepers should cross. This forms what is called "the double cross" and helps the shooter's eye and the skip's temper. This is done for the same reason that a chicken crosses the road.

If a skip misers a shot, the other three players should collect on the ice and hold a social grouch. This also helps the skip's next shot.

If the third man is away, the skip should never move up his men. This might well give them a swelled head. Pick the strongest player in the waiting room. The spectators will never notice.

As soon as the lead or second man delivers his rock, he should hurry back to the tee and take up his position behind the sweeping score. He may be more valuable there than in his proper position, as his foot may stop a rock which would otherwise slide out. Besides if the players line up in a solid wall on the tee it encourages the spectators to go home to bed.—Ex.

MERCHANTS—Remember, The Enterprise has the agency for Canada's biggest and best Calendar house. We guarantee to supply you at a great deal less than you will pay if ordered through any transient agent. Phone us, and our representative will call on you. Prices from 15 cents each up.

## ADDRESS BY HIS EXCELLENCY THE GOVERNOR-GENERAL AT OTTAWA RE SCOUT MOVEMENT

The following address was delivered by His Excellency the Governor-General at Ottawa on January 11th. I am now starting my fifth and last year in Canada as Governor-General. During every one of the past four years, I have travelled many thousands of miles throughout this wonderful Dominion. As the representative of the King in this country, I have endeavored to testify to Canadians of all ages, in your great cities and in your remotest country districts, the close personal interest that His Majesty feels in all his Canadian subjects.

In my travels, I have met a very great number of the men, women and children of this glorious country. I have seen many sides of Canadian life. I have seen, I hope, something of the hearts and minds of Canadians, as well as much of their outward activities. It has been, as you can imagine, a very agreeable, but also a very moving, and a very illuminating experience. From that experience, one impression stands out more vividly, perhaps, than all the others I have gathered—and that is that Canada, as a country, is vitally insistent with the spirit of Youth.

By that, I do not mean that Canada is, historically, a young nation, as nations go. I do not mean, either, that Canada at the present moment offers greater professional opportunities to Youth than do other countries. What I do mean is that Canada today seems to me pre-eminently conscious of the needs of Youth, anxious to give Youth a fair chance, proud of its own boys and girls, and determined to make the most of the best raw material of citizenship which these glorious boys and girls provide; and this explains what I have also noticed everywhere—that in Canada, the elders seem to stay younger, to keep Youth in their hearts longer than they do in most countries. There is, in fact, throughout this great country, a deep-seated sympathy with Youth, a realization of the obligations of Age to Youth, which is one of Canada's greatest national assets.

There are in the world today many so-called "Youth Movements"; but of all those of which I have any knowledge the one for boys that appeals most to me is the Boy Scout Movement.

In my opinion, this organization which lays such stress on honor, on loyalty, on neighborliness, and on "playing the game," is the one that is the finest and is best suited to Canada. Naturally, its emphasis on loyalty appeals to me, for is not life made up of loyalties—loyalty to one's friends; loyalty to those things that are beautiful and good; loyalty to one's country; loyalty to our King; and above all, and most important of all, loyalty to God.

Doubtless you have heard that the Chief Scout of the World, Lord Baden-Powell, is coming to Canada next spring, and that I have challenged the Scout Organization to celebrate what may be his last visit by laying plans for a considerable expansion and improvement of the Movement. Canada has 65,000 excellent Scouts, but I know that is not enough. There should be at least one hundred thousand in this country, and Scouting should be made available to the hundreds of smaller communities which at present have no organized activities of any kind for their boys.

Mr. Beatty, the President of the Scout Organization in Canada, is just as much in earnest about this matter as I am. With his co-operation, an all-Canada Conference of Scout Provincial Presidents, and Provincial Commissioners, met in Ottawa last September, and decided to accept my challenge.

Organization for the campaign, with this object in view, will begin tomorrow, and I am calling upon every

BLAIRMORE UNITED CHURCH  
Rev. Albert E. Larkie, Minister

"Serve the Church that the Church May Serve You."

2 p.m.—JUNIOR SCHOOL.  
7:20 p.m.—PUBLIC WORSHIP

## ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, B.A., Rector

Services Sunday, January 20th: Sunday School at 10 a.m. Morning service at 11 o'clock. The Bible class will meet every Thursday in the church at 7:30 p.m. Everyone welcome.

adult member of the Association in every Province, and upon everyone who loves Canada, to lend a hand with this big task.

May I ask the people of the Dominion to do this for me? I would feel a great deal happier on the sad day when I return to England, on giving up my office, if I could report that the Scout Movement, which lays such stress on loyalty to the Throne, had been firmly placed upon its feet for the next five years, and that plans had been completed for greatly extending and increasing its usefulness to Canada.

To be a good Canadian and a good Scout will always, I feel sure, be synonymous terms.

Among the local district students obtaining honors standing in the 1934 examinations are mentioned: Edna Bell, Kathleen Moyle, Wilma Halliwell, Myrtle Johnson, Coleman; Linnea Hagglund, Florence McDonald, Bellevue; Donald James Thornton, Hillcrest; and Dorothy Elizabeth Hamilton, Blairmore. The following normalites are eligible for diplomas with honors: Linnea Hagglund, Bellevue; Samuel Richards, and Isabel Westrup, Hillcrest. For matriculation: Cecil Johnson, Blairmore.

### The World At The Cross-Roads

The history of this old world unfolds a continuing story of revolutions, some peaceful in character, some accomplished by physical force accompanied by great loss of life, incalculable suffering, and enormous destruction. Over and over again the history of man records revolutions, political, religious, social and economic.

In many cases it is impossible to say when a revolution actually began and when it may be said to have ended, because there were no gradual in development and progress as to be regarded as evolutionary instead of revolutionary, yet in their ultimate effect upon mankind they were distinctly revolutionary in character.

On the other hand, there have been revolutions which may be said to have started almost overnight and reached their climax in a very short period of time, but in underlying causes nevertheless had been accumulating throughout the preceding years.

The birth and teachings of Confucius, Mohammed, Jesus, Martin Luther, were all revolutionary in the religious life of peoples; the discovery of the power of steam ushered in the industrial age and revolutionized the whole economic structure through the machine replacing hand labor; the invention of printing completely altered the social fabric, and science and invention have progressively changed political, social and economic systems.

Other revolutions of a political character have had a lasting effect upon the world, although many of them, unlike the other revolutions referred to, operated not to advance the welfare and betterment of mankind, but to set back the hands of the clock of progress and delay betterment which would have been promoted through more orderly evolutionary processes.

The world is now passing through another revolutionary stage, and while conditions and developments prior to the Great War were laying a foundation for the present upheaval, the war itself may be designated as the culminating event which marks the beginning of the revolution, which embraces our political, religious, social and economic life and activities.

In some countries of Europe and Asia this revolution has developed and is being promoted through the application of physical force, restriction of individual rights and liberties, the overthrow of democratic political institutions, interference with religious liberties and beliefs, all ending in the assumption of full power by autocratic dictators. And on this continent of the new world, the forces of the revolution are now being set on foot to inflame the people to forsake their individual liberties, overthrow the existing system under which, whatever its defects, they have attained their present state of civilization, and revert to a state and method of living from which the race has progressed upward throughout the centuries of the past.

And because of the difficulties of the present, inseparable from any great change, and without giving due heed to the lessons of all past history, many people are giving an attentive ear to the impassioned urgings of the prophets of despair, who, of course, are pointing the way to the rosiest pictures of what the future will be if their particular panacea is accepted.

On this continent of the new world people have been trained in the idea of democratic government, government of the people, by the people, for the people—that it was the duty of a government to govern; that governments were created solely for that purpose. Now the idea is urged that governments should not govern people but that people themselves dictate, but that governments should order and control the people; that instead of the people being supreme, controlling the government, the government should be supreme and control the people, and ordering the people. That is, the proposal is a reversion to what is known as the Dark Ages when kings and barons ruled and the people worked and obeyed.

And in order of seeking support for taking this backward step people are offered "security." People want security, they are entitled to it, they must have it. And the people can and will get it because they have the power to establish and control and ordering the people. That is, the proposal is a reversion to what is known as the Dark Ages when kings and barons ruled and the people worked and obeyed.

It is also urged that only through the overthrow of the existing system can equality be established. But equality does not and cannot exist under any system. It does not exist under any system to-day, and never existed under any system of the past. Neither things nor people can be made equal. But things can be made equitable—and must be made so if we would preserve ourselves.

In this age, as in past ages, not merely inequality but things inequitable exist. The latter must be righted and can be. The wide existing margin between different classes of society may be closed. As has been stated, it, "there should be neither treacherous peaks at the top nor unexplored depths at the bottom; rather, by bringing these two extremes closer together, the world will have another revolution on its hands, and the suffering shall be within reason and, in better days, excess wealth devoid of madness." Things must be made equitable.

New methods and new support for taking this backward step people are offered "security." People want security, they are entitled to it, they must have it. And the people can and will get it because they have the power to establish and control and ordering the people. That is, the proposal is a reversion to what is known as the Dark Ages when kings and barons ruled and the people worked and obeyed.

It is also urged that only through the overthrow of the existing system can equality be established. But equality does not and cannot exist under any system. It does not exist under any system to-day, and never existed under any system of the past. Neither things nor people can be made equal. But things can be made equitable—and must be made so if we would preserve ourselves.

In excavating Durs on the Euphrates, archaeologists found human skeletons in some shops, suggesting that shopkeepers died defending their property or were burned in the Persian raid of 256 A.D.

## SKIN RASHES

Give Place to Velvet Smooth Skin

In almost countless numbers, skin sufferers have had cause to be thankful for D.D.D., the prescription of highly successful physician, Dr. R. D. D. D. This liquid prescription, now made and endorsed by Canada's leading skin chemists, delays irritation almost at once, and quickly clears up such skin troubles as eczema, hives, acne, ringworm, dandruff, pimples and rashes. Ask your druggist for D.D.D. Prescription. Trial size, 25c. Guaranteed to give instant relief or money refunded.

W. N. U. 2021

## Running Crime To Earth

Royal Canadian Mounted Police To Obtain Instructions From Scotland Yard

It seems a good idea to send officers of the Royal Canadian Mounted Police to famed Scotland Yard, in London, Eng., for instruction in criminal investigation work and in other branches of police activity. Two high officers of the force are about to leave for three months' instruction—Assistant Commissioner Wood, of Regina, and Assistant Commissioner Dann, of the Manitoba and northwestern Ontario division.

More and more are the Mounted Police engaging in work that calls for scientific application. More and more are they engaging in work that takes in the whole of Canada and that involves every type of criminal. It is important, therefore, that its members be thoroughly "up" on the job of combatting crime. More and more does crime prevention work call for intelligence and expert methods.

The R.C.M.P., by contacting itself with Scotland Yard in this way, will have the benefit of experience with perhaps the world's greatest crime detection agency. Scotland Yard has a great reputation for hunting down and bringing to book offenders against society. Like the Mounted Police of Western Canada itself, it has a name for "getting its man." Regina Leader-Post.

## Economic Development

British Government Said To Have Scheme To Assist The Empire

Great Britain has about to announce a vast program of economic development throughout the empire, the Daily Herald, Laborite medium, said. The British government, the Herald added, would make the announcement after the commemoration on May 6 of King George V's silver jubilee.

It will take advantage of the presence in London of many Dominion and colonial statesmen to set forth a new plan for advancing loans at low rates, so as to permit all parts of the Empire to undertake public relief works, it was explained.

The Herald said funds would be lent on condition that they would be expended for the good of British industry. It drew the conclusion that the national government's move was an attempt to hasten the general elections.

## Russians Do Glider Stunts

Carry Out Two At Moscow Unique In Aviation History

Glider stunts have been made at Moscow unique in aviation history. The Soviet glider pilots, Koshitz and Garvish, demonstrated for the first time in the history of gliders, an "Immelmann barrel figure." The glider first climbed for a loop and after reaching the highest point in the loop continued flying horizontally upside down then returned to its original position. The Immelmann barrel figure, which consists of a double turning over the wing while flying horizontally was then carried out.

## Death Duties Enrich Britain

More than £400,000 or \$2,000,000 were added to the British Treasury in death duties in a single day on with proved at Somerset House, London, on Dec 7. The total amount in death duties for the first four months of the fiscal year ended Dec. 1 was \$225,521,411, only 3 per cent of which is unavailable on account of litigation.

## Card Was Delivered

Postal authorities at Calgary were presented with a problem when a postcard arrived with no address but the picture of the addressee. It was mailed from De Soto, Missouri, by a tourist who met the addressee on a trip through the Rocky Mountains and had forgotten his friend's name. He mailed the photograph and it didn't miss a delivery.

## Rheumatism

Is caused by failure of kidneys to remove uric acid poisons from the blood. Gin Pills relieve by neutralizing this acid and restoring the kidneys to normal action—See a box at all druggists.

## Does Not Say How

Moscow Professor Thinks Man Can Live To Great Age

The normal span of human life will eventually be extended to ages ranging from 150 to 180 years, according to Professor Lazarev of the Moscow Institute of Medicine in the course of an interview published by the Moscow Journal Pravda. Experiments, he said, had convinced him that human beings could be made to live at least twice as long as the "threescore years and ten" expectation of life to-day. "I have carried out experiments on certain animals," Professor Lazarev declared, "by which their recognized span of life has been increased as much as five times." But how life can be thus prolonged must remain the professor's own secret for the present, it seems. He is preparing to leave "on a biophysical expedition" to the Caucasus to "study the organic senses of good persons." "Geographical conditions," he says, "play a most important part in the functioning of the senses."

## Takes Mail To Lighthouse

Postman In England Climbs 403 Steps Every Day

Postmen in the towns and cities expect to climb steps on their daily delivery rounds—lots of steps—while a climber up a precipitous slope or down a deep dale is regarded in the rural areas as so much a common place in the day's work of getting the mail to the addresses as to be quite unworthy of comment. But to climb down and up million and a half steps in six years' experience, letters and parcels is a duty that surely merits special recognition, says the Post Office Magazine. Down 403 steps, up 403 steps, six days a week, month after month, year on year. This is part of the normal work of Mr. R. G. Ross, postman of Holyhead, who delivers the mail to the South Stack Lighthouse, Anglesey.

## Recipes For This Week

(By Betty Barclay)

### FRUITED OATMEAL DROPS

1½ cups (1 can) sweetened condensed milk  
¼ cup molasses  
2 cups rolled oats  
½ cup nut meats, chopped  
½ cup seedless raisins  
Thoroughly mix the sweetened condensed milk, molasses and rolled oats in top of double boiler. Cook over boiling water 10 minutes or until mixture thickens, stirring constantly. Cool. Add nut meats and raisins. Mix well. Drop by spoonfuls on a buttered pan. Bake 15 minutes in a moderate oven (350 degrees F.). Remove from pan immediately. Makes three dozen.

### COCONUT APPLE BETTY

4 tart apples, pared and thinly sliced.  
1 cup soft bread crumbs  
1 cup desiccated coconut  
½ cup brown sugar, firmly packed  
½ teaspoon cinnamon  
4 tablespoons butter.  
Arrange layer of apples in greased baking dish. Cover with bread crumbs and coconut; then sprinkle with mixture of sugar and cinnamon, and dot with butter. Repeat until all ingredients are used, topping with coconut. Cover and bake in moderate oven (350 degrees F.) 35 minutes. Uncover and bake 10 to 15 minutes longer, or until apples are soft. Serve six.

### Large Grain Cargo

The largest grain cargo to be taken from a Canadian Atlantic port in more than two years went from St. John to the United Kingdom by the steamship Trevalay. The first ship to go to St. John in that period for a full grain cargo, the Trevalay carried away upwards of 300,000 bushels.

### A River Of Ink

Algeria, in Northern Africa, has a river of ink. Chemicals carried by waters of two joining streams form an iron ink, black iron tannate. One stream flows out of a peat swamp impregnated with tannin, while the other comes through soil filled with iron deposits.

Woman (meaningly)—"It says here in the paper primitive men never wore shoes."

Hubert (growing)—"Hub! With so flat tires, wrong numbers, radio crooners, stock markets, in their day, what did they have to be profane about?"

He—"My treasure!"  
She—"My treasury."

## Here's the ABC of COLDS-CONTROL

- A To Help PREVENT Colds**  
At the first sneeze or nasal irritation, quick—in a few drops of Vicks VapoRub, its timely use helps to prevent many colds—and to throw off colds in their early stages.
- B To Help SHORTEN A Cold**  
At bedtime, just rub on Vicks VapoRub, the mother's standby in treating colds. All through the night, by stimulation and inhalation, VapoRub fights the cold direct.
- C To Build RESISTANCE To Colds**  
Follow the simple rules of health that are part of Vicks Plan for Better Control of Colds. The Plan has been clinically tested by practicing physicians—and proved in home use by millions. (You'll find full details of this unique Plan in each Vicks package.)

## VICKS PLAN FOR BETTER CONTROL OF COLDS

### Not All Thoughtless

Woman Driver In Toronto Has One Thing To Credit

When men and women drivers get together, it's always a hot point as to which sex is superior with the steering-wheel. Well, here are two incidents we witnessed in one week that the men will no doubt love to read about. . . . It was five o'clock at the corner of Queen and Yonge, and you know the parking rules in operation at that hour. A woman drove across the intersection, stopped in front of a corner store, and leisurely opened the door to pick up two friends. Meantime a T.T.S. car crossed the street, followed by a motorist anxious to get in front of the big red car, but there was the parked car. A policeman hurried forward to motion the lady on her way, but she blithely waited for her passengers to get comfortable. The other motorist honked to no purpose and finally honked in anger. A woman out his hands in despair, while the many onlookers chuckled sympathetically and murmured: "Those women drivers!" . . . The same day at King and Bay another feminine driver was halfway over the curb and kept bumping the car behind her. Finally a watching policeman stepped over to her and in a patient tone said: "Lady, you have it in reverse."

But here's one for the ladies. . . . A business woman getting her car from between two other parked cars on Dundas square found it necessary to shove the foremost car in front of a hydrant, but after she was safely out, she descended from her car and with thoughtful—and powerful—"woman-power" pushed the car from the forbidden spot. A couple of male observers gave her a clap—Toronto Telegram.

England now has one automobile for every 35 persons, compared with one for every five in the United States.

A courthouse clock in Indiana, U.S.A., was stopped by spiders which spun their webs inside the works.

The philosophy that identifies mind and matter is known as Pantheism.

St. Stephen, N.B., and Calais, Maine, situated on the St. Croix River, are towns in two different countries under two different flags, whose people are like one big family.

## Keep "Leftovers" Fresh and Tasty

You know how deliciously fresh waxed paper keeps sandwiches. "Para-Sani" Heavy Waxed Paper will do the same for cut meats, cake and other foods that remain at the end of the meal. "Para-Sani" enables you to serve these left-overs again, knowing that they still possess their appetizing flavour and freshness.

"Para-Sani" comes in a handy roll, just tear off what you need against the sharp edge of the box. For less waxed uses "Centre-Fold" Wax Paper in sheets is very popular.

Your druggist, grocer or stationer has them both.

Appelford Paper Products Ltd.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

## JOINT ACTION TO DEAL WITH THE DROUTH PROBLEM

Saskatoon.—Establishment of a joint committee representative of the Manitoba, Saskatchewan and Alberta governments to receive and discuss information on the drouth problem on the Canadian prairies with the ultimate objective of a uniform policy for the benefit of western agriculture, was the main result of a round table conference of the premiers of the three prairie provinces held in Saskatoon.

The new board, to be named the joint committee on land utilization and management, was announced by the premiers at the close of their all-day session here. It also was announced that the federal government would be asked to appoint representation to the body for a meeting to be held at a date yet to be arranged. This meeting, it was decided, should take place before February 7. Present at the conference were Hon. John Bracken, premier of Manitoba, Hon. J. G. Gardiner, premier of Saskatchewan, Hon. R. G. Reid, premier of Alberta, and Hon. J. G. Taggart, Saskatchewan minister of agriculture.

The government leaders expressed purpose to discuss ways and means of co-ordinating efforts in the three prairie provinces to deal with difficulties arising out of drouth.

They disclosed they had come to the conference with open minds on the subject of western agriculture's primary menace and hoped at the initial gathering to evolve some basis for uniform future action. The joint committee, they announced at the close of their deliberations, would receive and compile all information available on which policies for the future might be based.

The exact nature of the discussions, other than the need for a central organ for the gathering of information and formation of policy, could not be learned.

### Marketing Scheme

Manitoba Livestock Association Approves Of Principle

Brandon, Man.—Approval in principle of a marketing scheme under the Natural Products Marketing Act was voted by the Manitoba livestock, sheep and swine breeders' associations of Manitoba in session here.

The draft was submitted by a committee named by the various breeders' associations to study the various schemes proposed in Manitoba, and also by organizations in Saskatchewan and Alberta. Dr. J. A. Munn, of Carman, was chairman of the committee. Further alterations will be made and submitted to later meetings.

The draft provides that all livestock shall be sold through public markets. Marketing costs in Manitoba would be controlled through co-operation between the Manitoba and Dominion governments. Export of livestock would be directed by a separate export board.

Whether the export board would work independently or in co-operation with boards in Saskatchewan and Alberta was considered but no decision made. Considerable discussion centred on the degree of control which the boards controlling both domestic marketing and export marketing would exercise. The point was undecided.

### Modern Voting In Sweden

Electrical Apparatus To Be Used By Parliament Members

Stockholm.—Voting in the Swedish riksdag will soon be modernized. Members of the two houses of parliament will not even have to raise their hands in order to register their "yes" or "no." Instead, as the result of a bill recently passed, all a member need do to cast his vote is to press a button.

The riksdag is to have electrical apparatus installed which will work so swiftly that an entire vote may be conducted and tabulated within 60 seconds.

Western Mayors To Meet Calgary.—Total of cities accepting the invitation to attend a meeting of western Canada mayors here Jan. 28 to discuss problems of municipal debts and interest rates reached 12 when favorable replies were received from Medicine Hat and North Battleford.

W. N. U. 2081.

### Awarded Damages

Long Drawn Out Case Over Sinking Of Steam Barge Is Settled  
Washington.—The United States-Canadian commission to arbitrate the controversy resulting from the sinking of the tug runner, *Im Alone*, off the Louisiana coast in 1929 held that the United States should apologize for sinking the vessel and should pay Canada \$25,000 as compensation.

The decision was given by Justice Van Devanter, of the United States supreme court and Chief Justice Duff, of Canada.

In the long drawn out case Canada had claimed damages of \$350,000.

The commission reported that no compensation should be allowed to the owner for the ship or its cargo.

As for the master and crew it was found they were not parties to any conspiracy to smuggle liquor into the United States, but were mere employees to navigate the ship from place to place as owners directed.

By reason of their non-participation in the alleged conspiracy, the commission found they should be compensated for their clothing and effects which were sunk with the ship and for the wrong that was done them by casting them into the sea and then putting them in irons. This was done by the coast guard.

The commission recommended the United States pay John T. Randall, captain of the ship, \$7,000; representatives of John Williams, crew member, who has since died, \$1,250; James Jensen, \$1,000; James Barrett, \$1,032; representatives of William Wordsworth, now dead, \$57; Eddie Young, \$500; Chasley Hobbs, \$1,323; and Edward Fouchard, \$965. All the latter were members of the crew.

Amanda Mainigny, widow of Leon Mainigny, sailor who lost his life when the *Im Alone* was sunk, was awarded \$10,185 for herself and children.

### Take Over Ceded Territory

Italy Prepares To Possess New Holdings In Africa

Rome.—Benito Mussolini made ready to take over quickly Italy's new France, as the suggestion was advanced that the two nations might invite Germany to renew discussions concerning disarmament.

General Emilio de Bono, minister of colonies, was reported preparing to sail from Africa shortly to supervise personally incorporation into Eritrea of the strategic triangle of territory at the southern end of the Red Sea.

It was expected an official communique would be issued announcing de Bono's resignation from the cabinet and Mussolini's addition of the colonies portfolio to the six he already holds—foreign affairs, finance, justice, interior and corporations.

General de Bono, veteran Fascist, also will effect the consolidation of Somaliland and Eritrea under one administration for greater efficiency.

The suggestion of German collaboration in an agreement for an improvement in the European demand for wheat was seen here by Andrew Cairns, Canadian secretary of the international wheat conference.

Such a condition, Cairns said, would tend to cancel the effects of favorable weather during December, which brought good pasturage for most European areas and small demand for foreign grain.

Five men were believed to have perished when a motor boat sank while grinding ice in the Danube river at Ada Hija island near Belgrade.

Railroad and telegraph traffic throughout Yugoslavia was tied up by a 30-hour blizzard and communication with the Dalmatian coast virtually severed.

Similar conditions prevailed in Hungary and Austria, where 10 inches of snow fell in 24 hours. More than 22,000 workers, including many women, found employment digging Vienna out from beneath its icy blanket.

### To Complete Honeymoon

Duke and Duchess of Kent Will Sail For British West Indies  
London.—The newly-married royal couple, the Duke and Duchess of Kent, will sail for the British West Indies on Jan. 25 for a visit of several weeks, completing their honeymoon.

Announcement was made that the king's youngest son and his lovely bride, the former Princess Marina of Greece, will sail on board the Duchess of Richmond, which is going on a 48-day cruise to the West Indies.

They will not remain aboard during the cruise, however, and will return by another steamer. They are not expected back until early in April.

It will be the first visit to the West Indies for Prince George as well as for Princess Marina.

They have been in England since their wedding at Westminster abbey on Nov. 29, a festive occasion for London, but are expected to visit the continent before sailing for the West Indies.

## TO CURB EVILS OF EXPLOITATION BY CORPORATIONS

Ottawa.—Amendments to the Dominion Companies Act will be introduced at the forthcoming parliamentary session which will, Prime Minister R. B. Bennett declared, "with the co-operation of the citizens of Canada, stamp out evils in corporations operating under Dominion charters."

The amendments would, among other things, abolish the right to issue shares of no par value. Mr. Bennett closed the fourth of his series of broadcast addresses with a reference to those who might describe his reform policies as "radicalism." He anticipated that charge.

"Selfish men, corporations without souls, those fearful that this government might impinge upon what they have come to regard as their immortal right of exploitation, will whisper against us," he said. "We fear them not. The lives and happiness of too many people depend upon our success, to allow the selfishness of a few individuals to endanger it."

The address marked the close of Mr. Bennett's account of his stewardship, his outline of needed reforms, and his proposals to meet the need.

Establishment of the central bank, measures designed to make low rate short-term credits more abundant, and government financing, were reviewed. The central bank, Mr. Bennett said, would be "charged with the responsibility of seeing that the volume of credit available does not depend upon the working of competitive business forces. It will be a powerful instrument for social justice."

The decision Canadian people would be asked to make in the general election would be momentous—"the most momentous, except one, that you have ever taken," the prime minister continued, and he expressed the belief that electors would support his platform of reform. Mr. Bennett did not name the one exception.

### WOULD CHANGE ECONOMIC SYSTEM

Premier R. B. Bennett, who has been delivering a series of radio addresses, advocating a number of reform measures which he will introduce if given a mandate to do so.

### Armament Race

Says United States and Japan Building On Pre-War Basis

London.—The United States and Japan are clearing their decks for a naval armament race, the Financial News has warned.

"There is only one fundamental danger-point in the Pacific—denunciation of the Washington naval treaty by Japan, coupled with a \$180,000,000 increase in defence estimates," said the paper. "This means that the way is practically clear for a naval race of the pre-war variety."

The editorial added there was an urgent need for adoption of a decisive British policy in the Pacific, with a view to keeping the peace.

After pointing out that Britain would be "badly put for replacements" in naval race, the Financial News said that in order to improve Anglo-Japanese political relations "perhaps the first essential" is an improvement of trade relations.

### Just An Experiment

Manitoba To Ship Chilled Beef To United Kingdom

Brandon.—Hon. D. G. McKenzie, Manitoba minister of agriculture, announced here the Manitoba government will sponsor a test shipment of chilled beef to the United Kingdom market this year.

Arrangements have been made with Winnipeg packing houses to make the shipments, said Mr. McKenzie in address to a meeting of Manitoba livestock associations here. The shipment would be made as an experiment.

The government would sponsor a shipment of 100 head of cattle to the United Kingdom market as well, said Mr. McKenzie. He expected the cattle to be ready for export next August. Where possible the cattle would be put on the feeding lots of the boys' and girls' club.

### A NEW WONDER CAR—THE GNAT

The smallest racing car in the world, capable of 120 miles an hour, has just been introduced in England by Jean Reville, the midge car speedway champion of Great Britain. This is the forerunner of a small fleet which will provide greater speed and thrills for speedway fans in the British Isles during the coming season. Here we see Mr. Reville at the wheel of his car, the Gnat, after a trial run.

### New Bluebird Car

Sir Malcolm Campbell Has Re-designed Motor Racer

Brooklands, Eng.—A great aquat new Bluebird which Sir Malcolm Campbell hopes to send stinging down the sand at Daytona Beach, Fla., at more than 300 miles per hour a little over a month hence, emerged from its cocoon here.

Product of 18 months of unceasing research and labor, the famous racing monster presented a vastly altered appearance and surprised even those closest to her equally famous pilot.

Completely redesigned, from her broad snout to the tip of her tail fin over 28 feet away, the glistening new juggernaut is now so flattened out it looks almost like a bobbed on wheels.

Viewed from the front, there is a distinct resemblance to a flat-head shark, with an air intake shutter across the front making a realistic mouth. Sir Malcolm seemed proud of this shutter than anything else. "When I close it at top speed I should get 15 more miles per hour," he said.

### Will Train In Vancouver

Noted Moose Jaw Girl Swimmer Goes To Coast

Vancouver.—Phyllis Dewar, of Moose Jaw, woman swimming champion, voted the greatest woman athlete in Canada during 1934 by a Dominion-wide poll of sports writers, has become an adopted daughter of Vancouver.

Miss Dewar is now a member of the Vancouver Amateur Swimming Club and will be under the coaching of Phyllis Dewar. The coach plans to point Miss Dewar towards championships in all distances from 50 yards to a mile.

## IMPLEMENT FIRMS ARE INVESTIGATED BY COMMISSION

Ottawa.—Only one of the four big farm implement companies of Canada had suffered severe financial losses through the depression at the end of 1933, the royal commission on mass buying learned from Walter Gordon, Toronto auditor.

Starting the list of its major investigations, the commission was told Massey-Harris Co. Ltd., rolled up a deficit of \$15,993,000 in the years 1931, 1932, and 1933 while accumulated surpluses took care of the losses of the other three big companies, International Harvester Co. of Canada, Cockshutt Plow Co., Ltd., and Frost and Wood.

At the end of 1933, a comparison of the four companies showed Massey-Harris was the only one in the red although all had taken operating losses with the start of the depression.

The commission completed the last stages of two investigations, the canning business and the milling and baking industry.

W. R. Drynan, general manager of Canadian Canneries, Ltd., of Hamilton, left three or four suggestions with the commission, designed to help the canning industry. He proposed a fund of \$250,000, with contributions from the Dominion government, canners, can manufacturers and others, to be used for publicity to stimulate a national appetite for tomatoes. In addition, Drynan said his company was willing to draft a new agreement with fruit and vegetable growers and settle difficulties through a joint council and, where possible, pay higher prices. Another of his suggestions was a crop hazard insurance scheme handled by the Dominion with the canners making contributions. It would be patterned after the wheat insurance of the west.

Because of the maze of detail, the commission made only slight progress with the farm implement probe. Gordon presented figures to show the four large companies carrying \$33,312,000 as accounts receivable and he promised to elaborate this later in his report. Of this sum, Massey-Harris carry \$16,972,000 and International Harvester \$12,390,000.

The \$15,000,000 deficit of Massey-Harris at the end of 1933 was contrasted by Gordon with a surplus of \$6,989,000 by the International Harvester, \$21,412 by Cockshutt Plow and \$20,427 by Frost and Wood.

Sales of farm implements have fallen drastically in recent years, from \$51,974,000 to \$9,068,000 in 1933 for the four large companies alone. Their percentage of net profit fell proportionately, leading to the operating losses.

## NEW INSURANCE PLAN TO ASSIST IDLE IN BRITAIN

London.—Britain's new unemployment insurance board was taking over from local authorities the administration of relief under the new system, which on March 1 will mean control of 4,000,000 unemployed persons.

Full centralization of relief work will not be accomplished until March, but 240 local offices which came into existence began their work.

Sir Henry Betterton, newly created baron, is head of the board. He will be personal guardian of Britain's jobless and in effect administrator of government expenditures totalling \$275,000,000 annually.

The move to centralize relief work, Sir Henry declared, would make for equality of treatment and uniform administration throughout the country.

"The board is fully alive to the fact the needs of 1,000,000 families affected cannot be forced into one mold," Sir Henry said. He cited the fact rents vary in different localities and that therefore allowances for rent must vary also. He said allowances for children will be liberalized and more generous provisions made for the personal requirements of wage earners.

Applicants will have rights of appeal for this purpose to 150 appeal tribunals set up by the board. The board has wide discretionary powers, but Sir Henry promised it would not be a "beat-less machine."

Between now and March 1 the board will have direct control of 750,000 persons, and this control will be enlarged after the entire transfer is actually completed.

The proposed changes in the insurance system drafted by the unemployment assistance board before Christmas provided allowances of three shillings weekly for each child under five years old, graduated upward to 10 shillings to dependents 21 years of age.

Part of the new system took effect on January 7 while the rest will come into force March 1.

A basic minimum of 24 shillings weekly for man and wife is provided in the new scale of payments, which will apply to unemployed now receiving transitional relief payment and other unemployed whose present help is the poor relief fund.

The new system is expected to cost Great Britain approximately £3,000,000 approximately \$15,000,000 annually in addition to the present £41,000,000 paid transitional recipients. Between 3,000,000 and 4,000,000 persons are expected to benefit under the new plan.

### Wheat For China

20,000 Bushels Of Canadian Wheat Shipped To Orient

Winnipeg.—Approximately 20,000 bushels of No. 2 Northern wheat were sold to China recently, believed to be the first time on record high-grade Canadian wheat has been shipped directly to that country from Canada.

It was thought here the wheat, destined for Shanghai, would be mixed with Australian and Argentine varieties to improve the quality of those wheats. Australia and Argentina have been doing a brisk business recently with the Orient, exporting wheat both to China and Japan.

### Profit For British Banks

Net Gain For Big Five \$2,110,000 During Last Year

London.—The "Big Five" British banks announced profits for 1934 which in all cases are higher than in 1933. Dividends, however, are unchanged.

Net profits aggregated \$44,100,000, an increase of \$2,110,000 in 1933. The big four British railways a few days ago announced similar increases for 1934.

The "Big Five" banks are Barclay's Bank, Lloyds', Midland, National Provincial and Westminster banks.

### Gandhi Embarrassed

Delhi, India.—M. K. Gandhi is being embarrassed at end these days by a gentleman who has adopted the famous Gandhi starvation methods in dealing with the Mahatma himself. One Shamunder, a Delhi cloth pedler, has planted himself at the Mahatma's doorstep, and for nearly a week has been starving himself before Gandhi's door in an attempt to win the Indian leader over to his point of view.

Blairmore, Alta., Thurs. Jan. 17, 1935

**EDITORIAL**

A settlement has been agreed upon in the case of Powell vs. The University of Alberta. This means that the case will not proceed to the Supreme Court of Canada and we are now free to comment upon it. Although we have approached responsible officials, they will not as yet make any public statements, as the terms of the settlement have not been finally reached.

Owing to the considerable body of jurists who were of the opinion that the decision of the Alberta court was wrong in law; owing to the importance of the case and the necessity for a final decision; owing to the considerable expense already entailed to which an appeal would have added but little; owing to the unfortunate light in which the case leaves the University, it is with considerable regret that we view the decision not to carry the case any further. If a settlement had been made in the beginning this would have been the happiest result for all concerned. Unfortunately the plaintiffs refused the settlement offered them, although in so far as we can ascertain the expected settlement will conform to the first offer made to the plaintiffs. The case having gone as far as it had, there are many reasons why it should not have been settled at this late time.

Considering the case only from its legal aspects, many feel the Appellate Division of the Supreme Court of Alberta arrived at an incorrect decision. There is a strong argument that the University is a branch of the Crown and as cannot be sued in tort on the ground of liability of the University for negligence, the remarks of the Lord Chief Justice of England in a case decided last December are very enlightening (we quote from a newspaper report): "Referring to the suggestion that the boy had been 'ragged' at school, Lord Hewart pointed

out that the lad was not an infant of tender years. He was 17, a good runner, and could cycle 30 miles a day. But for some reason or other he used strongly-scented hair-oil. 'Some people like, some loathe it,' his lordship continued. 'There is no sin in using strongly-scented hair-oil, but school-boys sometimes resent it. What list they do? They put his head under the tap to wash off the scented hair-oil. The plaintiffs were not keeping a conservatory for hot-house plants. Is it seriously suggested that the ragging was an important element in the picture?' Apparently the Lord Chief Justice of England does not consider 'ragging' as grounds for liability. When we consider the thousands of students who have passed through a University of Alberta initiation and the fact that it had decreased in its vigour, we may well wonder what were the grounds for the University's liability.

At present the University is in a very awkward position. What are its responsibilities to its students? It is manifestly impossible for the authorities to control and regulate the relations of students one with another, and yet it has been declared such is the law. The question must be settled, yet when it could have been settled once and for all by the expenditure of very little more in proportion to what has been already spent, it was decided not to continue the appeal.

The fact whether initiation was a good or bad thing does not concern us now. Initiation, however, was labelled 'bestial,' and those who inflicted it must therefore have been degraded persons. Criticisms made of certain authorities which the student-fuel were unfair remain a matter of public record. Are these not matters in themselves which necessitated an appeal, or that we might have had at least the further opportunity of clearing ourselves?

The decision to settle the case leaves the matter in a very unsatisfactory state. The student body, we believe, will unanimously condemn a settlement which makes a definite ruling on student and University responsibilities from our highest tribunal unobtainable. We await with interest the official statements.—The Gateway

**District News**

From Our Own Correspondents

**HILLCREST HAPPENINGS**

The whist drive and dance sponsored by the C.W.L. was a great success. The prizes for whist were won by Mrs. M. Homoluk, Mrs. Mithus and Mr. K. Rhys. After cards, supper was served by the ladies, and dancing then continued till 12.30 to music supplied by the Band-Its.

Mr. and Mrs. Leonard Lewis were visitors at the home of Mrs. Snowden in Coleman for a few days last week.

The Hillcrest intermediate girls defeated the Blairmore Cyclones at a basketball game here on Friday. The local intermediate boys were defeated by the Cyclones.

Mr. and Mrs. R. G. Drinnan, of Edmonton, formerly of Hillcrest, sailed last week on the Empress of Britain from New York on a trip around the world.

B. J. Richards, who has been employed in Mountain Park, returned home last Friday.

Billy Ironmonger entertained his friends at a skating party last Friday evening. After an hour's skating, the guests repaired to Billy's home, where a delicious supper was served.

Gwyn Richards, returned from Edmonton last week, owing to ill health, and is confined to his home.

At a hockey game here on Sunday afternoon, the local juniors were defeated 5-5 by the Bellevue juniors.

**BELLEVUE HAPPENINGS**

There passed away at the home of her daughter here on Monday, Mrs. Jessie Bort, of Chapel Rock district. Mrs. Bort was brought to town about a month ago, suffering from pneumonia. For a while there was hope of recovery, but as time wore on she became weaker, passing away about 2 a.m. Monday. She was but 42 years of age, and leaves behind her a passing husband and a number of children, one of whom is Mrs. Joseph Vysobid, at whose home here she passed away. The youngest member of the family is a four-month-old daughter. The funeral arrangements were in charge of the Crow's Nest Undertaking Co., and the remains were laid to rest in the Union cemetery at Blairmore on Wednesday afternoon. The sympathy of the community is extended to Mr. Bort and family in their bereavement.

Mrs. C. W. Johnson entertained a number of friends at her home on Thursday last.

At the regular meeting of Ray of Hope Rebekah Lodge on Wednesday evening of last week, the following officers were installed for the ensuing term by Sister V. Curry, D.D.P.: Sister E. Dowson, P.N.G.; Sister J. Litherland, N.G.; Sister A. Turner, V.G.; Sister M. McEachern, recording secretary; Sister B. Nicholson, financial secretary; Sister E. Shewels, treasurer; Sister E. Prescott, warden; Sister M. Kaye, conductress; Sister M. Milnes, chaplain; Sister A. Padgett, R.S.N.G.; Sister O. Johnson, L.S.N.G.; Sister L. Goodwin, R.S.V.G.; Sister V. Saynor, L.S.V.G.; Sister B. Radford, O.G.; Sister M. Cousens, I.G.; Sister E. Jordan, organist.

Mrs. F. Hallworth entertained a number of ladies at her home on Friday.

Miss Doris Chiaravano returned to Calgary last week.

Miss B. Nicholson entertained a number of friends at her home on Tuesday evening.

A successful dance was held in the L.O.O.F. hall on Saturday evening, sponsored by the Zig-Zag basketball team.

Mrs. John Shewels entertained a number of guests at a party on Saturday evening.

Teacher: "Where does a Scotchman get his ink?"

Pupil: "By collecting used blotting paper."

**COWLEY HAPPENINGS**

M. A. Murphy is attending the Shriner's ceremonial at Calgary this week.

Mrs. Gerald Bradshaw made a trip to Lethbridge on Wednesday.

Today (Wednesday) a raging blizzard is sweeping the country and piling huge drifts of snow, higher and higher. Already they are the largest we can remember in thirty-five years. With us here, the weather has been unusually stormy ever since the 16th of December, with only a day or so of decent weather during that time.

The two turkeys drawn for at the gentlemen's card party on Wednesday evening were won by Ronald Morrison and Mike Soukeroff.

Mickey Porter, aged 14, was badly hurt when thrown from a horse about 6 o'clock on Saturday evening. The accident happened when the horse the boy was riding slipped on ice, badly breaking the thigh bone in the all. First aid was administered immediately, when the boy was packed into a sleigh and brought a distance of 15 miles into town, when a motor car was secured to take him on to Hillcrest hospital, where he was attended by three doctors, who set the broken bones early the following

morning. Today, word was received from the hospital, saying that the boy's condition is rather serious, and that the doctor's report is that he will have to lie in a plaster of Paris cast for perhaps three months in order to effect a proper recovery.

A joint meeting of the Pincher Creek and Cowley Social Credit study groups was held at Cowley on Thursday night last, for the purpose of consolidating to look after the Pincher Creek constituency. A form of organization was decided upon, when would look after the educational work, and the following officers were elected: Wm. Abethart, hon. president; M. A. Murphy, president; J. Co-

(Fincher Creek), Mrs. T. Hammond (Summerville) and F. A. Testan (Cowley), vice-presidents. It was decided to carry out the request of the central office for a straw vote, to ascertain the strength of the Social Credit support. After the meeting, luncheon was served by the Cowley group.

An Irishman obtained a position at an observatory, and spent some time looking at the telescope. A professor walked in and started taking observations, when a star fell. "Begorra, that was a fine shot! And you hardly had time to aim at it!" exclaimed Pat.

### MR BENNETT'S SPEECHES

No. 1 Speech—An outline of policy of reforms with a passionate appeal to the everlasting loyalty and never-ending courage of our undaunted, indomitable Canadian people.

No. 2 Speech—An outline of an outline of a policy of reform interlarded with confessions that it has been a hard day, but with the everlasting loyalty and never-ending courage of our undaunted, indomitable Canadian people he would win through.

No. 3 Speech—An outline of an out-

line of an outline of policy of reform and a modest admission that reviewed first with interest and now with deep concern the rise of the capitalist system from 1744 to 1935, but with the everlasting loyalty and never-ending courage of our undaunted, indomitable Canadian people, 1936 would arrive.

No. 4 Speech—An outline of an outline of an outline of an outline of a policy of reform together with a pious benediction of the holy travail of all Canadian Youth, but with everlasting loyalty and never-ending courage of our "choosy" Canadian Youth—

Mr. King's Speeches  
"And Huffy Billy sits on the Hill,  
Waiting for R.B. to take his spill.  
And all of King's horses and all of King's men

Are unable to make him speak again."—The Gateway.

### IS THIS A SYSTEM?

We call it a system—this economic maze through which we exchange our labors for the things we need or want. And apparently it is because of the "economic system" that eighty Polish miners are risking their lives in a suicide strike 250 feet down in a coal pit in Baska. They are protesting against abandonment of the shaft by owners, who say its coal is so poor as to make it worthless. The strikers, who stayed below the surface to hinder flooding, desired to continue its operation as their own enterprise.

The owners didn't want the mine, reports indicate. The miners did. But it is not simply a dog-in-the-manger attitude that is expressed in the mining company's refusal to grant their employees' request. In all probability creditors must be considered—bankers who have lent money on the property, and depositors, many of them wage earners, who have lent money to the bankers.

Perhaps all these people would be willing to take the loss necessary to provide the miners with a mine. But where in this economic machine is the ready lever to bring about such an adjustment? And how could custodians of people's money—which may be spread over several coal-mining investments—risk lessening the safety and profits of those investments by gratuitously setting up an enterprise which might compete in an already crowded market?

So it can only be asked, what kind of a system is it that prevents you from giving away something you don't need or want to somebody who does need and want it? Actually, of course, it is not a system at all, as all students of economics know, but a melange of systems which work contrawise, often nullifying one another's effects. History is largely a map of mankind's march against the brutal aspects of this chaos and toward harmonising its humane ones. Along this line men have come far.

But far they have to go, says the economic milepost at Baska.—Christian Science Monitor.

### ANCIENT GAGSTER

Dorian is the grandfather, many times removed, of all gagsters. He lived nearly 2000 years ago, but some of his witticisms still survive. Once, in Milo, Egypt, he was unable to find lodging. During his wanderings he came across a priest at his sacrifices, and asked him to whom he was sacri-

ficing.  
"To Jupiter and Neptune," replied the priest.

"How should I expect to find lodgings," sighed Dorian, "when the gods lie double."

One night, when he was supping with a prince, he expressed great admiration for a gold cup. "The goldsmith will make you one like it when you please," observed the prince.

"He will make one to your order much sooner than to mine," replied Dorian. "Let me have this and

you order another."

Commenting upon the despatch of a tempest in the Nappilus of Thebes, he remarked that he had seen a better one in a boiling pot. "That was probably the origin of the saying, 'A tempest in a teapot.'"

George Palmer, well known radi-  
and one time reporter on the staff of the Moscow Daily News, has announced that he will be a candidate in the next provincial election.

## CONSTIPATION ENDED FOREVER

### Woman Finds a Permanent Remedy

With perfect frankness a woman correspondent writes: "I have suffered from constipation as long as I can remember, and tried all sorts of things—which in some cases seemed to do good at first, but afterwards to have no effect. I thought I would try Kruschen in my tea every morning, and I have done so for over a year. I am pleased to say that after the first month I had no more trouble with constipation, and I have felt very fit." (Mrs.) G. M. Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate the organs of elimination to smooth, regular action. Your system is thus kept clear of those impurities which, if allowed to accumulate, lower the whole tone of the system.

## WORLD HAPPENINGS BRIEFLY TOLD

A fortune in gold greater than any mined since pre-war years was taken from the rich hills and streams of Western Australia in 1934. It was announced the value of the total production was valued at £2,772,708.

It was announced the government of the Irish Free State has implemented the recent understanding with the British government for greater exchange of Irish cattle and British coal.

Commissioner John McMillan, Canada's new Salvation Army chief, and Mrs. McMillan arrived in Toronto to take over command of their new territory. It is the commissioner's third post in Canada.

With public meetings throughout the Dominion, a Canadian Education Week will be held under the auspices of the Canadian Teacher's Federation from Feb. 3rd to the 9th, it was announced in Montreal.

More than 500 lives were lost due to motor vehicle accidents in Ontario during 1934, a bulletin issued by the provincial department of highways states. Approximately 10,000 were injured, some permanently crippled or disfigured. Fatalities and accidents increased over last year.

The city of Vancouver has no intention of repudiating its debt charges, Mayor G. G. McGee declared, but he intends to move for reduction of high interest rates municipally, in all Canada, as well as provincially and federally.

Saskatchewan motorists who operated on the deferred payment plan in 1934 will be delinquent on obtaining 1935 licenses until their past dues are paid. In order to effectively cope with the problem, motor license officials have been instructed at the branch offices to issue no license plates. All plates are to be issued from the Regina office.

### Monster Timber Wolf

Trapper Near Sudbury Shoots Huge Beast Over Seven Feet Long

In front of a Sudbury fur store hangs the pelt of what must have been one of the largest Canadian timber wolves. The fur is 7½ feet long from nose to tail. The beast, brought down in the heavy timber of Gogama district, stood 2½ feet high when alive.

Two weeks ago C. Potvin, Gogama trapper, rounded a bend of a creek while covering his trap lines and suddenly found himself 12 feet in front of the largest wolf he had ever seen. With the wind at its back, the animal had not scented the man approaching.

With blood and fur on its jaw from a rabbit it had just killed, the wolf bristled and made a challenge at the stunned trapper. As the beast tensed for its leap, the trapper shot and the wolf dropped in its tracks, shot through the head.

### Aerial Device Success

Scientists at the University of Chicago have perfected a baby atmosphere balloon, it is an automatic fact-recorder aerial device. During recent tests, the balloon soared more than 14 miles and before its contents were dashed to bits, the automatic radio broadcasting device had sent its precoding records back to the receiving set.

"I expect my wife to be just what I am in ten twenty years from today."

"Why, that's unreasonable."

"Yes, that's exactly what she is now."

W. N. U. 2081

### Suffering Of Jap Peasants

Being Undernourished Most Of Them Die In Their Forties

The following article by T. Yoshino, appeared in the Nippo Yohbun, Prague, Czechoslovakia. If Japan mobilizes against the Soviet Union, it needs more than the few divisions that are sufficient to deal with the Chinese generals, it needs the Japanese peasants obeying the military.

In our village peasants work in the fields from sunrise, not returning until the evening stars appear in the sky. They spend the whole day bent over their labor. Being undernourished, they look like skeletons in their forties. They have a sun-scorched, dry, dirt-colored skin, deep lines in their faces, thin cheeks with sharply protruding ribs, and blue spots under their eyes.

Their children look like skeletons. They walk barefoot, as do their wives and children. They are chary of words and mistrust outsiders. Every poor peasant would get drunk if he had the money, but our peasants never have any extra. They earn so little that they can hardly pay the interest on their debts and prepare for the next harvest.

They have stopped eating meat and fish and cannot even afford rice. They live on the roots of plants, a little cooked wheat meal, and turnips boiled in salt water.

More than three-fifths of the agrarian population eke out a hungry existence in this way. Even the middle peasants are content if they can eat rice and some fish. The agricultural police officials report that the peasants steal the pet animals of well-to-do people in the towns, running the risk of the severe punishments that are meted out for such a crime. The same police reports also state that the number of robberies is increasing day by day and that in many parts of the country peasants are uprooting the trees in the holy royal forests.

The children of the poor peasants are undernourished. The prefect of the northern provinces states that the school children in his districts look as if they were all suffering from jaundice. They go to school with empty stomachs and collapse unconscious during the recess periods, with the result that numerous schoolmasters have been permitted to give up recess temporarily.

### Compliment To Dr. Dafoe

Ontario Minister Of Health Pays Tribute To The Country Physician. Dr. J. A. Faulkner, Ontario minister of health; Dr. Edmund Kelly, noted specialist of Johns Hopkins University, and Dr. W. A. Dafoe were recent weekend guests of Dr. A. R. Dafoe, the Dionne physician.

Dr. Kelly, who is personally interested in the quintuplets, and makes the trips to Callander at his own expense, administered radical treatment to the tumor on Baby Marie's thigh. He later expressed the belief the tumor would soon vanish.

It was the first visit of the Hon. Dr. Faulkner, and he was impressed by the care the five little sisters were receiving.

"I cannot pay too high a compliment to Dr. Dafoe," the cabinet minister remarked. "He is an example for the medical fraternity and has drawn deserved attention to the country doctor, a class whose service has been little understood, and certainly not fully appreciated."

Expect Levels Will Never Be So Low Again As Has Been This Winter. There's a good possibility, U.S. army engineers believe, that never again will low see the Great Lakes water levels so low as they have been this winter.

Mother Nature is taking a hand, they say, to restore the lakes to a normal level and once that point is reached an ambitious engineering scheme is already designed to keep it that way.

The engineers propose to do it by constructing a series of compensating weirs—large obstructions—at the bottom of the St. Clair and Niagara rivers at a cost of approximately \$1,200,000.

The immediate major hope for increasing the lakes' levels is the opinion of Major W. F. Heavey, of the army engineers' staff in Cleveland, lies in the fact that this winter the Lake Superior region has experienced the heaviest rain and snowfall in a score of years.

"But, madam, I'm afraid you are making a mistake. I'm a doctor, but a doctor of music."

"I know," said the old lady. "I've a terrible singing in my ears."

During the season of the year when friends delight to drop in unexpectedly is a time you will appreciate the value of PURITY FLOUR. Not only does it make delicious shortbread—always a favorite with the unexpected guest—but it is truly the flour which is best for all your baking. Whether you are making light, airy cakes, delicious flaky pastries, or more starchy cakes, such as bread or rolls, you will find the uniformly high quality of PURITY an asset in your kitchen. Each bag maintained at the same high level, through careful selection of hard spring wheat in Western Canada by our representatives. Buy bags of PURITY FLOUR at your grocer's. You'll find one brand—and that PURITY—all you need to keep in your kitchen for all kinds of baking.

TAILORED FELPUM DRESS FOR BUSINESS AND "DRESS-UP" TYPE FOR PARTIES IN ONE PATTERN!

By Ellen Worth. Don't you think this little penguin dress smart? It wraps the figure in such a youthful way. And isn't the scarf tricky enough through a slash-and-bound opening?

This little rig is stunning in a woolen material, may look like Kelly, or the scarlet collar velvet or self material is smart. Of course this model is lovely, too, carried out in pebbly crepe silk.

The model in the miniature sketch is bright red pebbly crepe silk. Again this model is adaptable in transparent velvet or cashmere crepe silk.

Style No. 222 is designed for sizes 14, 16, 18 years, 36, 38 and 40-inches bust. Size 18 requires 5½ yards of 36-inch material with 1½ yards 38-inch contrasting for dress and jacket.

Patterns \$20 each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E. Winnipeg.

Excise \$20 extra if you wish a copy of our Fall and Winter Fashion Magazine. Pattern and magazine are mailed post paid.

"Book To Make Better Dresses," booklet, a helpful guide to sewing, is obtainable for 30c. Whether you are a beginner or quite adept with the needle, we think it would pay you to obtain a copy.

A man's knowledge cannot be compared with a woman's intuition.

### YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT (Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: Handwriting will often reveal talents as well as your weak and strong characteristics. A Character Analysis might mean the beginning of a new life for you. Read the author's invitation following this article.)

Mr. J., Winnipeg, writes: "I am sending you a sample of my girl friend's writing with my own and would like to ask you what I can do about stopping the quarrels that we seem to be having so often. She is a very nice girl in many ways and I am extremely fond of her, but we have these quarrels—silly they often seem to me—and unless something is done about it, it looks as though we shall drift apart. I do not want to place all the blame on my girl friend, but I do believe that I myself am not really responsible for these quarrels. I am sure that all that I can do to have things go smoothly along. Can you give me any advice?"

My dear Mr. J., the writing of your girl friend shows that she easily takes offence. She is inclined to carry a chip on her shoulders, and often imagines slights where none are intended. The trouble with this is that, almost invariably, the person most concerned does not realize it.

This characteristic can cause a great deal of harm. It has led to perpetual bickering between the two of you, and may easily put an end to your romance, unless steps are taken to eradicate it.

I am writing to you direct, and will compose a separate letter covering your girl friend's writing, and it may be that, by showing it to her, you will be able to bring home to her what a serious characteristic it is. I sincerely hope that it may be the means of stopping your trouble.

Miss W., writes: "How can I keep my boy friend, I am very much in love with him, and really believe that he loves me in return. Not only because he tells me so, but because of those little things that tell a girl when a boy really thinks a lot about her. But, lately, he seems to have been going out with other girls, and I am enclosing a specimen of his handwriting, and would like you to tell me what his real character is. Is there anything good about him, or why is he going out with other girls? Does that show that he does not really love me after all? I am so worried, and would appreciate so much your advice."

The first thing I notice, Miss W., I want to tell you that your boy friend is reliable enough. He is a normal type of young fellow, very intelligent, perhaps, but straightforward. The trouble in his case is that he is somewhat vain. He thinks a good deal of himself.

I have a pretty shrewd idea that he is quite good-looking. The other girls have appealed to his egotism, and, feeling quite pleased, he has been going out with one or two of them.

It is significant, however, that he comes back to you, Miss W. My opinion is that he will grow out of this sense of ostentation. Something may turn up that will give him a shock—something that will change his self-complacency. There is a deep-rooted balance in his nature that will come to the surface before long.

Do not make the mistake of pandering to his egotism. Do not get into the habit of catering to his vanity. Be natural with him, as you have always been. That is really what always has made him love you, and he probably does not realize it.

Can this weak-writer and graphologist help you, as he has helped so many others? Your handwriting tells the true story about the real you, and their handwriting will tell the truth about their friends. Send specimens of the writing you wish to be analyzed, stating date, in each case, and enclose 10c for each specimen. Send with the analysis. Write to Lawrence Hibbert, Graphologist, care of Winnipeg Newspaper Union, 175 McDermott Ave. E. Winnipeg. Letters are all confidential, of course. Replies will be sent as quickly as possible, but please allow at least two weeks for your reply.

Dried Fruit in powdered form is a new confection in London

### SUNDAY SCHOOL LESSON

JANUARY 20

PETER'S LESSON IN HUMBLE SERVICE

Golden text: All of you give yourselves with humility, to serve one another. I. Peter 5:5.

Lesson: John 13:1-17; I. Peter 5:5.

Devotional Reading: Luke 14:7-11.

Explanations and Comments

Peter's Lesson in Humble Service, John 13:6-11. When Jesus came to Peter, Peter said, "Lord, dost thou wash my feet?" In the Greek the pronouns thou and my are in emphatic contrast at the beginning of the sentence.

Jesus answered, "What I do thou knowest not now; but thou shalt understand hereafter." Obviously these words had a deeper meaning than the immediate situation they referred to the test the disciples would meet in the coming hours when they would not understand the terrible events and would have to walk by faith. Only as the incidents in the Upper Room were surveyed in the light of Gethsemane, Calvary and the Resurrection, could they be understood.

Impulsively Peter then exclaimed, "Thou shalt never wash my feet." "It was the strange mixture of self-conceit and self-dignity—the self-conceit which under the shadow of Hermon had called upon him so stern a rebuke when he had said, 'That be far from thee, Lord; this shall not be unto thee,' and the self-dignity which, on the Sea of Galilee, had flung him to his knees with that cry, 'Thou art my Lord and my Saviour.' Depart from me, for I am a sinful man, O Lord." (P. W. Farrar).

That the customary foot-washing had not been performed before the meal began was due, we gather from Peter's parallel account, to the fact that the disciples had been disputing as to which of them was the greatest, and there was no one among them free from self-assertion and jealousy to perform this menial task for the others. Jesus showed them that the patent of nobility within the Kingdom of Christ is the towel with which man girds himself for service.

Jesus' reply, "If I wash thee not thou has no part with me," caused a complete revolution of feeling in Peter. "No part with thee! If washing is necessary to fellowship with thee, then wash me, my feet only, but my hands and my head!" he quickly exclaimed. "He that is bathed [comes from the bath through the streets] needs not save to wash his feet, but is clean every whit." Jesus explained, still speaking figuratively, that the one who morally clean still needs cleansing from special faults. "Ye are clean, but ye all have added, referring to Judas who was false through and through.

### Famous Quintuplets

Ontario Government Keeping Watchful Eye On Contracts For Publicity

The Mail and Empire in a news story says the Ontario attorney-general's department "is reported to be keeping a watchful eye on contracts which may be entered into shortly on behalf of the Dionne quintuplets."

The Mail story says: "Neither the department nor the official guardians, which Hon. Arthur W. Robbuck appointed to the babies last fall, will, it is understood, tolerate any agreements of a 'side-show' character, but on the other hand are not adverse, it is said, to contracts that would have substantial revenues for the youngsters' future upbringing without prejudicing their health."

### Grew Supplies Moisture

Corn is grown without the aid of rain on the Canary Islands. Dew supplies the moisture and the stalks are so short that the ears touch the ground. The crop is planted in a bunch of clinders, preventing evaporation.

One feature in favor of the old style phonograph over the radio is that it doesn't take time out to tell us about tooth paste, auto tires and stomach medicine.

### Little Journeys In Science

ELECTRICITY (By Gordon H. Guest, M.A.)

The first observed electrical effects were produced by rubbing amber, and the word electricity is derived from the Greek word for amber, namely elektron. Amber was used in spinning, the oldest handwork known to the human race. Spinning was performed by means of the distaff, and sometimes the spindles were made of amber. The spinner called her spindle the "clutcher" because as the spindle descended and whirled around, it rubbed against the loose feminine garments, thus becoming electrified, and on nearing the ground, it attracted bits of chaff or leaves.

It was not, however, until 1600 A.D. that Dr. William Gilbert, surgeon to Queen Elizabeth, and sometimes referred to as the father of the modern science of electricity and magnetism, discovered that when a glass rod and about twenty other substances were rubbed separately with silk, these bodies, like amber, became electrified. Many years later it was observed that when sealing-wax was rubbed with cat's fur, the wax took on an electric charge, which differed from that of the glass. Benjamin Franklin introduced the terms positive and negative to distinguish the two kinds of electricity. It was Franklin who observed by flying a kite in a thunder storm and drawing sparks from the insulated lower end of the kite string that lightning and electricity were the same. He was the inventor of the lightning rod.

According to Franklin, any body is positively charged with electricity if it is repelled by a glass rod which has been electrified by silk, and negatively charged if repelled by sealing-wax which has been rubbed by cat's fur. These distinctions given us by the famous Franklin, are still in use.

It was shown many years ago that when a glass rod is rubbed with silk, the latter takes up a negative charge exactly equal to the positive charge of the glass. Thus, in general, it may be stated that positive and negative charges of electricity always appear at the same time and in exactly equal quantities.

Saw Much Active Service Varied Career Of British General Who Retired in 1920. General Sir Archibald Hunter, who has been in hospital in Jamaica, had seen an unusual amount of active service when he retired in 1920, says the News of the World. Fifty years ago he was a private in the Grenadier Guards, and was dangerously wounded. Later he commanded the Donagoo Frontier Force and was Governor of Omdurman. He was called from India to lead a division in South Africa, and was one of the most successful British generals in that campaign. For three years he was Governor of Gibraltar, and at the outbreak of the Great War he was in command of the Third Army. For four years he represented Lancashire in Parliament.

### Must Know His Job

Dictator Of Turkey Pays Man To Taste His Food

Mustapha Kemal Pasha, dictator of Turkey, assigns one of his secret service men to taste all his food for him one hour before he dines. Evidently the ruler "must" know his job for a nice fellow. He must know what is a yeast. The man who gets \$15,000 a year for this work does not seem to mind it. He says he saves food money and eats of the best of everything although there may not be much future in the job.

### The First organized attack on cancer

by educating the public was made in 1902, when a German physician, issued a pamphlet and newspaper publicity.

Twenty-five per cent. of the apricot crop in Shepparton, Australia, district, was destroyed in recent storms.

**THE TENDERFOOT**  
By  
GEORGE B. RODNEY

Author of "The Coronado Trail",  
"The Canyon Trail", Etc.

## SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He shows Stone and Crowe, the Hour-glass cattle and protests against it.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, who accompanied by Edith Carr was riding fence a long way from the Hour-glass cattle ranch house.

Dustin unexpectedly comes along and seeing them, Stone and Edith to Edith. He mentions the Soda Springs dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Stone tells Crowe, his foreman, about his meeting with Dustin, and is warned that Dustin would kill him if he got the chance. Stone and Crowe go to Secco to send a telegram to Gerald Keene. While at Secco an attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Dustin has seen the Broken Spur ranch, and Edith Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery and appraise its value. Dad Kane shows Dustin the mine and samples of the rich ore he took from it.

(Now Go On With The Story)

## CHAPTER IX—Continued

Kane struggled in his blankets and came back to consciousness in an unlovely figure in the half-light. His gray old face was covered with a two-weeks-old stubble, his mouth dribbled tobacco-juice and his eyes were rheumy with sleep. Such a man had no right to live.

"Come on over here. I have something to say to you."

Kane got up and moved over, squatting by the side of the fire. He pulled the coffee-pot to him and filled

## Now Science Explains Why So Many People Past 40

Feel That They're Slipping  
Losing Their "Grip" on Things

Many people "round 40" think they're "growing old." They feel tired a lot. "Weak." Have headaches, dizziness, stomach upsets, and so on.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach.

Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all.

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Form in Canada.

**ALSO IN TABLET FORM!**  
Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. They are the equivalent of a teaspoonful of the liquid form of Phillips' Milk of Magnesia.

**PHILLIPS'**  
Milk of Magnesia

W. N. U. 2081

his cup, for, like all prospectors, he could drink coffee at any hour.

"Well," he said, ambivalently, "shoot your wad."

"That vein you showed me looks mighty good at first sight," said Dustin.

There was no room for argument there. It was a statement that met Kane's whole-hearted approval.

"I've been huntin' for somethin' like it for more'n thirty years," he said. "Go on."

"After We've staked out our claim . . . What then?"

Kane temporized. He knew well enough what the usual steps were.

As a rule the man who had grubstaked the prospector got half the claim, sold out the man to whom he sold it would be reluctant to invest more money. It was always a question of more money. The whole history of mining in the West is replete with that. Thirteen dollars are put in every mine for each dollar that is taken out. . . . Till the property passes into the hands of a corporation that has money to throw away.

Kane sucked his pipe reflectively. "Well," he said finally, "I reckon we'll have to hire a lawyer an' fight our claim through the courts. After that we kin build a dam over in Coyote Canon. . . . That's just over the next ridge . . . an' pipe the water over here; put our crusher an' tables in here. . . . An' . . ."

He droned on in the unending plans of ignorant prospectors the world over. "Anyhow," he said, "there's a million in it."

"There might have been," said Dustin sharply. "If you hadn't been a damned fool." He chose this way to lash himself into a fury that would justify to himself what he meant to do. Kane was quite right. There were millions in it . . . but not for Kane!

"Where's the ore you took out?" he asked sharply.

"I stacked two sacks of it over there. . . . Kane waved his hand at a shadowy mesquite clump. "Did you think I'd salted it on you?"

Dustin said nothing. He followed the squat figure through the scrub to a formless pile of ore-sacks, selected a couple of pieces of ore-laden rock from one of them and dropped them into his coat pocket. Then he turned to Kane who was watching him shrewdly.

"You damned old fool," he snarled. "You've got us into a nice mess. You've staked out the fire with Kane behind him and his hand dove deep into his saddle bag and lay by his blankets. His quick eyes took in Peyotl quivering asleep on the far side of the fire; his gorilla-like limbs flung wide. His hand came out of that saddle-bag with something in it; something that he covered with a quick flick of the blanket and Kane gaped at him as Dustin flung one of the ore-samples into the fire.

"You and your salted stuff," said Dustin angrily.

"Balted. . . . Kane emitted an angry roar and snatched at the rock. Even a desert rat has his points of honor, and this was old Kane's, but he never lived to make his point.

A short, stabbing jet of flame leaped from the loose blanket over Dustin's arm. A flat, smacking report like the noise a plank makes in falling on quiet water jarred the desert night. A little swirl of white smoke eddied from the end of the blanket and old Kane, Dad Kane, Shammy-skin Kane, old and very wise Ulysses of the foothills, sank to his knees and slowly rolled over on his face while his claw-like hands worked convulsively. Then he lay still.

Dustin cast a hurried, frightened glance over his shoulder at the still-sleeping Peyotl. His quick eyes, with a hunted glare in them took in the purplish of the camp, glancing at him and brush and stunted bush that surrounded them. The world-old query of the killer was taking form: "Did any one see me?"

Even Dustin could not stand the strain.

"Oh, my God!" . . . He choked a little. . . . He dropped like a shot rabbit. . . . Then he rocked on his heels and was violently sick.

For a moment he squatted there in the brush overcome by the violence of his emotions. Even in his life, had as it had been, this had never happened before. The need had never arisen. If old Kane had only struggled or fought it out it would have been different. He felt that even some show of violence would have given him a reasonable excuse. Suppose some one had seen him!

Then common sense came to his relief. He knew there could be no man in this wild land. There could be no danger of course but first of all he must complete his work. He must eliminate all chance of suspicion. From the very first he had been to make Peyotl the scapegoat for his act.

He snatched that lump of ore from the ashes. Then, though his shrinking muscles nearly refused to function, he dashed the rock in the blood at the back of Kane's head and laid the rock aside. Again he scrutinized the hills, now blue-black with the falling night. No danger from any observer there! The hobbled horse seeing him move, dashed off into the brush anticipating capture. What a fool he was to think that muffled report would arouse Peyotl!

Under ordinary conditions a Deranger pistol makes little noise and he had silenced his with a blanket. The vast silence of the desert enveloped him as in a blanket and cold wind from the hills chilled him to the bone but he walked over to the fire, rummaged among the bedding where Kane had slept and then came back to where Kane lay. In a dash he picked up the still limp body and carried it to the fire and laid it head to foot by the gorilla-like shape of the sleeping Peyotl. With the care of a workman who looks only to a completed task, he laid the blood-stained rock in the great palm of the sleeping man. Then he half-emptied Peyotl's canteen and laid it between the two bodies. The next moment he was shaking Peyotl by the shoulder and shouting in his ears.

It was no light job to awaken Peyotl. He fought with hands and feet against awaking. He rolled and struggled and pitched and with every struggle Dustin's wrath grew. Finally with a last convulsive struggle Peyotl grunted and sat up.

He stared for a long, heart-breaking moment at the blood-stained rock clenched in his hand! Then his wondering eyes took in the limp body at his feet! The half-emptied canteen! His uncomprehending eyes swept Dustin staring at him and finally his gaze came back to Kane.

"What the hell . . . ?" demanded Peyotl dazedly. "What the hell . . . ?"

"His wavering finger traced a line in the air and his jaw dropped. His breath drew hard in great gasps and a look of insane terror dawned in his eyes.

"What in hell have you done, Peyotl?" demanded Dustin curiously. "I was out lookin' at the horses when I heard you two fightin'."

He stared for a long, heart-breaking moment at the blood-stained rock clenched in his hand! Then his wondering eyes took in the limp body at his feet! The half-emptied canteen! His uncomprehending eyes swept Dustin staring at him and finally his gaze came back to Kane.

"What the hell . . . ?" demanded Peyotl dazedly. "What the hell . . . ?"

The soul-racking ache continued. It is not in man to destroy his kind, or being innocent, to believe that he has killed, which is worse, without giving some sign.

"You just got mad and mashed his head in with that rock," said Dustin. "You had some fool doped dream about water. . . . Dreamed you were fightin' old Kane for water."

"There's the canteen. . . . And then I went to see you for takin' in. Look at that rock."

Peyotl dropped that rock as though it was red-hot and Dustin picked it up.

"Before God, Mist' Dustin, I never meant to do it. . . . I never had a word with him. . . . I liked the old man. . . . Why would I kill him. . . . ?"

"Oh, shut up, you fool! I understand how it was. He was kind of provokin' at times but that will not help you with a jury. . . . I'm just tryin' to figure it out. . . . Of course I ought to take you back and turn you in for murder. . . ."

Peyotl shivered.

"I don't see any good in killin' another man. It's too damned bad though about old Kane. . . . If any jury ever gets the evidence . . . Kane dead, empty canteen between you; you all hopped up with Peyotl; a fight between you over water. . . . You with a bloody rock in your hand and old Dad with the back of his head bashed in. . . . Huh! I reckon you'll hang, Peyotl. . . ."

"What're you goin' to do?"

"Do? What do you reckon I'm goin' to do? You poor fool! You've been workin' for the Broken Spur for five years. The Broken Spur don't throw off on its friends. Poor old Kane was only a desert-rat. In a year or two he'd have got his apples, I ought not to let you go, Peyotl. I ought not to do it but I'm goin' to anyway. Get a pick out of the pack and dig a hole under that mesquite bush where we can bury him."

In twenty minutes the panting Peyotl had dug a great pit in the rocky soil. While he was digging Dustin went away carefully through the pockets of the dead man. A muttered curse told that he had not found what he sought.

(To Be Continued)

## Alaska As Military Base

Logical One If Trouble Occurs Between U.S. And Asia

Vilhelmur Stefansson, the distinguished Arctic explorer, holds that Alaska is the true military base for the United States in conflict with an Asiatic power. He points out that Tokyo is twice the distance from Hawaii that it is from Alaska. This will be obvious if one studies a map of the North Pacific showing diminishing lines of longitude, as one approaches the North pole, and is not drawn on Mercator's projection.

This American base would be about the centre of the Aleutian chain of islands. Stefansson has great knowledge of the Arctic. He loves it. He spent several years among the Eskimos, living off the country. He came out hale and hearty. He is one of those who knows that the Arctic is not a frigid and desolate waste. Food is plenty and not hard to get by those who know the region. No one will deny that the cold is severe in season but the people who know the North prepare to meet it. The sea up there is full of fish. Seal may be taken often and in the short summer the air is full of ducks and geese and other aquatic fowl. These birds are plenty in that Far North and bring their young birds to maturity for the long flight to the South.

As the years pass it is becoming manifest that the waste lands are often good. Under their forbidding surface, treasure troves of iron and coal are found. Then the desert farther south may be irrigated and made to produce richly. Seeds become acclimated and so do the people. Any race that has become acclimated to the North lives and would not live in any other place. . . . For Arthur News-Chronicle.

## Brings in Large Amount

Royal Wedding Presents Were On Display For Charity

It is expected that the sum raised in charity by the display of the wedding presents of the Duke and Duchess of Kent will exceed the amount received after the wedding of the Princess Royal and the Earl of Harewood, whose presents were displayed on view at St. James's Palace, says the News of the World. The amount on that occasion was £8,274 18s 3d. Half the total will be allotted by the King, the other half by the Duke of Kent.

"Is your husband a member of any secret society?"

"He thinks so, but he takes in his sleep."

## QUICKEST METHOD TO RELIEVE A COLD

1. Take 2 Aspirin Tablets.

2. Drink full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 2 Aspirin Tablets in a third of a glass of water and gargle. This eases the soreness in your throat almost instantly.

Follow Directions to Ease Pain and Discomfort Almost Instantly

When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors everywhere to-day as the quick, safe way.

Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly.

Just take Aspirin and drink plenty of water . . . every 2 to 4 hours the first day—less often afterward. . . . If throat is sore, use the Aspirin gargle.

But be sure you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin Tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

## Air Power Of Germany

Handbook On Aviation Gives Rich Credit For Producing Fast Machines

James' "All the World's Aircraft," the authoritative handbook on aviation, reveals Germany is again a potential air power.

The 1935 edition, just published, describes more than 500 pages to detailed descriptions of the world's commercial and fighting craft. Germany, many of all the nations mentioned refused to supply information on its latest designs in planes and motors, according to C. G. Grey, editor.

"Whatever may be the truth," Gray writes, in the stories of the production of vast quantities of high-speed bombers and fighters in Germany, there is no getting away from the fact that the best German commercial planes and mail carriers could, with very little modification, be made into war machines. And we know that their high speed mail carriers habitually travel between Germany and Spain at a speed close to 200 miles an hour."

"What we are to see is the truth," Gray writes, in the stories of the production of vast quantities of high-speed bombers and fighters in Germany, there is no getting away from the fact that the best German commercial planes and mail carriers could, with very little modification, be made into war machines. And we know that their high speed mail carriers habitually travel between Germany and Spain at a speed close to 200 miles an hour."

## Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, etc., etc. Please items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

Four hundred Edmonton teachers voted against a threatened salary cut.

Amelia Earhart, famous aviatrix, successfully negotiated the non-stop flight from Hawaii to California.

Lethbridge Maple Leafs defeated Bellevue on Monday night last with a score of 5-3.

The Powell damage action against the University of Alberta has been settled for \$20,000 and costs.

E. K. Stewart, G. G. Moffatt, H. J. Johnson and Joseph Aiello, all Fernie businessmen, have petitioned the Supreme Court to appoint a government commissioner for the administration of that city.

Alberta Lodge No. 1, I.O.O.F., celebrated their fiftieth anniversary by holding a big banquet at the Palliser hotel, Calgary, on Friday evening last, which was attended by nearly 600 persons.

The suggestion has been made that, in future applications for naturalization should be advertised in the local district press, to permit local people to have a say as to whether or not the request should be granted. Today, the matter is left solely to the judge to decide.

The U.F.A. convention in Calgary turned down the Aberhart Social Credit scheme by a vote of 400 to 40. Instead, they will support a substitute scheme of monetary reform and plan to put relief men to work in industries to be established by the provincial government.

On Tuesday of this week, January 15th, was named by the government as the last day of the period of grace on the new auto license plates, after which a check-up would be made on cars appearing with the 1934 plates. By statute, new licenses are due January 1st. The law will be rigidly enforced.

Capt. H. E. Balfour, formerly of Victoria high school, Edmonton, and inspector for recent years in Grande Prairie district, has been appointed inspector of high schools for the province, following the elevation of H. C. Newland to the position of chief inspector of schools. Mr. Newland took the post vacated by Geo. W. Gorman, now deputy minister.

Constable Houghton has been in poor health for some time, and it was decided that he be given three months leave of absence at a council meeting on Tuesday. He has been employed by the town for over 16 years, taking over the duties after his return from overseas service during the Great War—Columbian Journal.

Mr. Spalding, formerly of Fernie, now of Vancouver, has called on local district druggists during the week on his annual tour in connection with his photographic business, which he established in Vancouver several years ago. Mr. Spalding formerly figured in publicity work for the Alberta and British Columbia Good Roads Association, and is fairly well known in this district.

Have you ever noticed that people in different lines of business carry their money in different ways? Grocers, butchers and cattle dealers carry their money in wads; bankers, clean bills laid full length in a pocket book; brokers in a single fold (just doubling their money); the young business man, in his vest pocket; the farmer, in an inside pocket; while the editor carries many of his dollar bills in the pockets of his subscribers.

Teacher: "What's good for corn?"  
Pupil: "Let your calves go down and eat them."

NO RUST—No dust. Use Nonouch Stove Polish and Floor Wax. J17-11

Robert Gardiner has been re-elected president of the U.F.A.

Hanna Social Creditors are operating a meat market.

Stormy weather still prevails, the thermometer digging down to something like 35 below this morning.

Mr. V. Krivsky is back at work in his meat market, having returned from Calgary over the week end, where he had been to receive special medical attention.

Henry Andrew Kidney died at Calgary on Friday last from injuries sustained in a car accident near Alderley on November 19th. Mr. Kidney was an official of the provincial department of municipal affairs.

Recently, when a citizen noticed Charlie Sartoris' truck coming into town with a load of straw, he asked a friend what that was for, and the reply came: "It's for the Social Credit vote."

Between two great metropolises: Pulling out of Calgary on Monday evening, the conductor found that of forty-seven passengers, no fewer than sixteen were heading for Blairmore.

J. L. Fawcett, K.C., of Macleod, and Max Moscovitch, of Lethbridge, attended a district court sitting here on Tuesday, at which His Honor Judge McDonald presided. Owing to the illness of Sert. Cawsey, the court adjourned to a later date.

## YOUR HOME IS YOUR CASTLE

Admit only clean, constructive news by reading THE CHRISTIAN SCIENCE MONITOR

A Daily Newspaper for the Home

It gives all the constructive world news but does not exploit crime and scandal. Has interesting feature pages for all the family as Women's Activities, Home-making, Gardens, Education and Books. Also pages for the Children and Young Folks. Vigorous editorials and an interpretation of news in the "March of the Nations" Column are of special interest to readers.
